

# Evolve™ Casegoods

Kimball® Office

# Distinctive appearance.

Evoke calls forth admiration for beauty that performs flawlessly. Attention to detail and meticulous craftsmanship establish Evoke within the rich Kimball Office heritage of finely crafted wood. Evoke continues the legacy with innovative combinations of hardwoods in a range of rich finishes, lustrous metals, and frosted glass.

- Evoke's surfaces appear to "float" above pedestals to give the collection its signature appearance
- Peter Wooding Design Associates identified a wide array of exquisite materials that combine to create your desired image
- Evoke was recognized with a Best of NeoCon award

# Flexible performance.

Evoke can be arranged to provide an effective place to work, while addressing the individual's personal requirements. Choices among components, configurations, and materials allow Evoke to take on dramatically different looks even as it gives people what they need to perform at their best.

Undersurface project shelf with project tray

Storage cubbies are freestanding so they can be moved anywhere on the credenza worksurface

Cantilever shelves

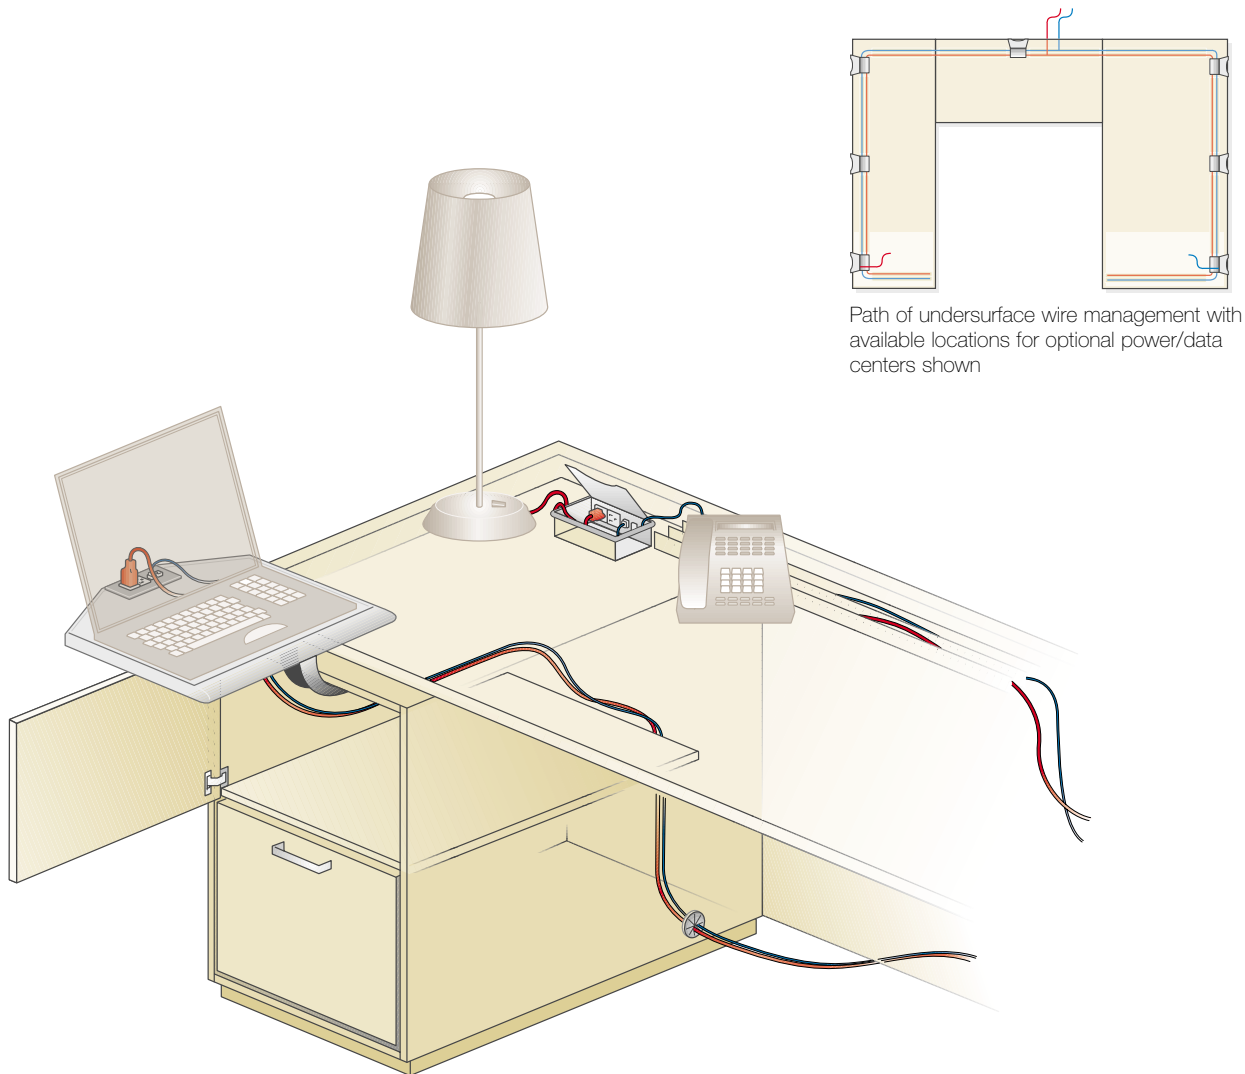

- The flexibility of Evoke's offering accommodates the needs of different users with only slight specification changes
- Mobile pedestals fit conveniently under desk, credenza, return, or bridge surfaces
- Cantilever shelves attach to the back panel of highback organizers for added storage
- For convenient access to frequently used materials, project trays fit within a highback organizer or below a worksurface when combined with an undersurface project shelf
- Evoke intelligently provides additional floor level storage areas

# Capable assistance.

Evoke combines unique appearance with solutions for supporting technology that address individual work styles. The result is an award-winning balance between looking good and working well.

- Grommets or power/data centers route cords and wires away from the worksurface to eliminate tangles
- A wire management system with flexible covering is attached below the worksurface, to allow cords to enter and exit at any point
- The wire management system also provides cross-component cable routing
- A retractable laptop platform swivels, tilts, raises and lowers with a touch of the hand, or stows away when the computer is not in use

A **power/data center** provides convenient access at the desktop for instant connections

# Superb details.

Evoke joins exquisitely crafted hardwood veneers—just as one would expect given the Kimball Office heritage—with a wide variety of appealing elements. The resulting combinations express a range of personalities from transitional to contemporary.

# Comprehensive choice.

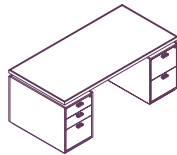

Evoke encompasses all the elements required to furnish a space for productive work. Desks, credenzas, bridges, and returns provide expansive surface areas for working. Overhead storage units and highback organizers use space efficiently while keeping materials close at hand. Lateral files and bookcases handle bulk storage with ease.

- A full line of built-up units makes specification and installation easy and straightforward
- A range of modular components respond to personal storage requirements
- Choices among two heights of highback organizers, vertical storage, and overhead storage put space above workspaces to productive use

# Kimball® Office. A place that works for you.

## The Designer

Peter Wooding established Peter Wooding Design Associates in 1978, after practicing various design capacities within several international corporations. His practice embraces a multidisciplinary approach and has produced award-winning designs for interiors, consumer products, furniture, systems and graphics. He has taught and lectured at a variety of institutions, including the Rhode Island School of Design, the University of Michigan, the Taipei Institute of Technology (Taiwan) and the Muchina School of Art and Design (St. Petersburg, Russia). As a former President of the Industrial Designers Society of America (IDSA), Wooding continues to be a spokesperson for design excellence.
